<tr>
<td>Mid Term Test</td>
<td>30%</td>
</tr>
<tr>
<td>Final Test</td>
<td>40%</td>
</tr>
</tbody>
</table>

FINAL EXAM: The final exam will be comprehensive.

This is a continuation from last semester. I will continue to ask you to read the material from the text before each class. However, as the material gets more difficult, I plan to spend more time on standard lecturing and explaining the proofs in proportion to exercise solving part.

To help you get through the difficulty of studying the abstract theory I will be assigning you homework exercises at least once a week. You will be expected to write the solutions, which I will correct. I will try to write you my comments in your solutions. I will also try to prepare you my own solutions to give you comparison between yours and mine approach. Let me also emphasize that some of the exercises might be more difficult that the others and I will not expect you to solve all exercises during the semester. However, to be at the "A" level for the homework I will expect you to solve 70-80% of all homework assignments.

The questions and discussions will be encouraged.
